Contents of Volume XXX

NO. 1. JANUARY 1967

Microelectrode study of synaptic excitation and inhibition in the lateral geniculate nucleus of the cat. McIlwain, J. T. and O. D. Creutzfeldt 1
Recurrent facilitation in cat pyramidal tract cells. Takahashi, K., K. Kubota, and M. Uno 22
Functional organization of a cortical efferent system examined with focal depth stimulation in cats. Asanuma, H. and H. Sakata 35
Neurons of the medial diencephalon. I. Somatosensory responses and caudate inhibition. Feltz, P., G. Krauthamer, and D. Albe-Fessard 55
Neurons of the medial diencephalon. II. Excitation of central origin. Krauthamer, G., P. Feltz, and D. Albe-Fessard 81
Plastic changes of unit activity based on reinforcing properties of extracellular stimulation of single neurons. Bureš, J. and O. Burešová 98
Release of acetylcholine from sympathetic preganglionic nerve terminals. Nishi, S., H. Soeda, and K. Koketsu 114
Presynaptic inhibition in the trigeminal relay nuclei. Stewart, D. H., Jr., C. J. Scibetta, and R. B. King 135
Motor units of the first superficial lumbrical muscle of the cat. Appelberg, B. and F. Emonet-Dénand 154

NO. 2. MARCH 1967

Physiology and ultrastructure of electrotonic junctions. I. Supramedullary neurons. Bennett, M. V. L., Y. Nakajima, and G. D. Pappas 161
Physiology and ultrastructure of electrotonic junctions. II. Spinal and medullary electromotor nuclei in Mormyrid fish. Bennett, M. V. L., G. D. Pappas, E. Aljure, and Y. Nakajima 180
Physiology and ultrastructure of electrotonic junctions. III. Giant electromotor neurons of *Malapterurus electricus*. Bennett, M. V. L., Y. Nakajima, and G. D. Pappas 209
Physiology and ultrastructure of electrotonic junctions. IV. Medullary electromotor nuclei in Gymnotid fish. Bennett, M. V. L., G. D. Pappas, M. Giménez, and Y. Nakajima 236
Electrophysiologic basis for pontine apneustic center and its role in integration of the Hering-Breuer reflex. Kahn, N. and S. C. Wang 301
Effects of spino-bulbo-spinal reflex volleys on extensor motoneurons of hindlimb in cats. Shimamura, M., S. Mori, and T. Yamauchi 319
Transfer properties of the lateral geniculate body. Maffei, L. and G. Rizzolatti 333
Role of brainstem auditory structures in sound localization. I. Trapezoid body, superior olive, and lateral lemniscus. Masterton, B., J. A. Jane, and I. T. Diamond 341
Properties of spontaneous and evoked synaptic activities of thalamic ventrobasal neurons. Maekawa, K. and D. P. Purpura 360
Synaptic actions of fibers in the ventral spinal cord upon lumbosacral motoneurons. Willis, W. D., J. C. Willis, and W. M. Thompson 382
Announcements 398

NO. 3. MAY 1967

Neural circuits involved in visuomotor reaction time in monkeys. MILLER, J. M. AND M. GLICKSTEIN 399
Single cell analysis of wavelength discrimination at the lateral geniculate nucleus in the macaque. DE VALOIS, R. L., I. ABRAMOV, AND W. R. MEAD 415
Effect of oxygen lack on the single isolated mammalian (rat) nerve fiber. MARUHASHI, J. AND E. B. WRIGHT 434
Functional coupling between the pyramidal tract and segmental motoneurons in cat and primate. STEWART, D. H., JR. AND J. B. PRESTON 453
Responses of Golgi tendon organs to active contractions of the soleus muscle of the cat. HOUK, J. AND E. HENNEMAN 466
Unitary responses in ventrolateral thalamus upon intranuclear stimulation. MARCO, L. A., T. S. BROWN, AND M. E. ROUSE 482
Long latent periods and further analysis of slow synaptic responses in sympathetic ganglia. LIBET, B. 494
Sensory discrimination thresholds with cutaneous nerve volleys in the cat. BOURASSA, C. M. AND J. E. SWETT 515
Comparison of sensory discrimination thresholds with muscle and cutaneous nerve volleys in the cat. SWETT, J. E. AND C. M. BOURASSA 530
A comparison of ganglion cell and S-potential response properties in carp retina. WITKOVSKY, P. 546
Effect of photoexcitation of the two retinas on pupil size. DOESSCHATE, J. TEN AND M. ALPERN 562
Influence of asymmetrical photoexcitation of the two retinas on pupil size. DOESSCHATE, J. TEN AND M. ALPERN 577
A hypothalamic region responsive to localized injection of pyrogens. JACKSON, D. L. 586
A single-unit analysis of the organization of Dieters' nucleus. WILSON, V. J., M. KATO, B. W. PETERSON, AND R. M. WYLIE 603
Reinnervation of smooth and striated muscle by sensory nerve fibers. VERA, C. L. AND J. V. LUCO 620
Dichoptic interactions of lateral geniculate neurons of cats to contralateral and ipsilateral eye stimulation. LINDSLEY, D. F., K. L. CHOW, AND M. GOLLENDER 628

NO. 4. JULY 1967

Neurophysiological characteristics of cardiovascular neurons in the medulla oblongata of the cat. PRZYBYLA, A. C. AND S. C. WANG 645
Recurrent interactions between motoneurons of known location in the cervical cord of the cat. THOMAS, R. C. AND V. J. WILSON 661
Somatosensory receptive fields of single units in cat cerebellar cortex. THACH, W. T., JR. 675
Hearing and cochlear microphonic potentials in the bat *Eptesicus fuscus*. DALLAND, J. I., J. A. VERNON, AND E. A. PETERSON 697
An ablation study of the auditory cortex in the cat using binaural tonal patterns. KAAS, J., S. AXELROD, AND I. T. DIAMOND 710
Physiological and chemical architecture of a lobster ganglion with particular reference to gamma-aminobutyrate and glutamate. OTSUKA, M., E. A. KRAVITZ, AND D. D. POTTER 725
A dendritic component in extracellular records from single cortical pyramidal tract neurons. ROSENTHAL, F. 753
Phase-locked response to low-frequency tones in single auditory nerve fibers of the squirrel monkey. ROSE, J. E., J. F. BRUGGE, D. J. ANDERSON, AND J. E. HIND 769

Coding of information pertaining to paired low-frequency tones in single auditory nerve fibers of the squirrel monkey. HIND, J. E., D. J. ANDERSON, J. F. BRUGGE, AND J. E. ROSE 794
Efferent olivocochlear bundle: some relationships to noise masking and to stimulus attenuation. DEWSON, J. H. III 817
Single-unit activity in temporal association cortex of the monkey. GROSS, C. G., P. H. SCHILLER, C. WELLS, AND G. L. GERSTEIN 833
An analysis of the activation of motor cortical neurons by surface stimulation. ROSENTHAL, J., H. J. WALLER, AND V. E. AMASSIAN 844
Reflex role played by efferent control of an invertebrate stretch receptor. FIELDS, H. L., W. H. EVOY, AND D. KENNEDY 859
Acoustically evoked potentials in the rat during conditioning. MARK, R. G. AND R. D. HALL 875
Fear and the modification of acoustically evoked potentials during conditioning. HALL, R. D. AND R. G. MARK 893
Changes in cortical extracellular space during spreading depression investigated with the electron microscope. VAN HARREVELD, A. AND F. I. KHATTAB 911

NO. 5. SEPTEMBER 1967

Physiological masking in the peripheral auditory system. III. Effect of varying test-click intensity. COATS, A. C. 931
Excitability changes of trigeminal primary afferent preterminals in brain-stem nuclear complex of squirrel monkey (*Saimiri sciureus*). SHENDE, M. C. AND R. B. KING 949
Presynaptic inhibition induced by vagal afferent volleys. RUDOMIN, P. 964
Frequency analysis of the electroretinogram. POPPELE, R. E. AND L. MAFFEI 982
Frequency analysis of the late receptor potential. MAFFEI, L. AND R. E. POPPELE 993
Physiological and anatomical studies on large neurons of the central nervous system of the sea lamprey (*Petromyzon marinus*). I. Müller and Mauthner cells. ROVAINEN, C. M. 1000
Physiological and anatomical studies on large neurons of central nervous system of the sea lamprey (*Petromyzon marinus*). II. Dorsal cells and giant interneurons. ROVAINEN, C. M. 1024
Maintained activity of cat retinal ganglion cells. RODIECK, R. W. 1043
Membrane impedance changes during synaptic transmission in cat spinal motoneurons. SMITH, T. G., R. B. WUERKER, AND K. FRANK 1072
Anomalous rectification in cat spinal motoneurons and effect of polarizing currents on excitatory postsynaptic potential. NELSON, P. G. AND K. FRANK 1097
Composite nature of the monosynaptic excitatory postsynaptic potential. BURKE, R. E. 1114
Distinguishing theoretical synaptic potentials computed for different soma-dendritic distributions of synaptic input. RALL, W. 1138
Dendritic location of synapses and possible mechanisms for the monosynaptic EPSP in motoneurons. RALL, W., R. E. BURKE, T. G. SMITH, P. G. NELSON, AND K. FRANK 1169
Electrophysiology of bulbar reticular neurons. SEGUNDO, J. P., T. TAKENAKA, AND H. ENCABO 1194
Somatic sensory properties of bulbar reticular neurons. SEGUNDO, J. P., T. TAKENAKA, AND H. ENCABO 1221
Stimulus coding by medial superior olivary neurons. MOUSHEGIAN, G., A. L. RUPERT, AND T. L. LANGFORD 1239
Announcement 1262

NO. 6. NOVEMBER 1967

A light and electron microscope study of the abdominal ganglion of *Aplysia californica*. COGGESHALL, R. E. ... 1263

Morphological and functional properties of identified neurons in the abdominal ganglion of *Aplysia californica*. FRAZIER, W. T., E. R. KANDEL, I. KUPFERMANN, R. WAZIRI, AND R. E. COGGESHALL ... 1288

Direct and common connections among identified neurons in *Aplysia*. KANDEL, E. R., W. T. FRAZIER, R. WAZIRI, AND R. E. COGGESHALL ... 1352

Neurophysiological studies on hearing in goldfish. FURUKAWA, T. AND Y. ISHII 1377

Habituation of spinal motoneurons. WICKELGREN, B. G. ... 1404

Habituation of spinal interneurons. WICKELGREN, B. G. ... 1424

Electrophysiology of the visual system in a nudibranch mollusc. DENNIS, M. J. 1439

Responses of Golgi tendon organs to forces applied to muscle tendon. HOUK, J. AND W. SIMON ... 1466

A viscoelastic interaction which produces one component of adaptation in responses of Golgi tendon organs. HOUK, J. ... 1482

Cerebellar facilitation of muscle spindle activity. GILMAN, S. AND W. I. MCDONALD 1494

Relation of afferent fiber conduction velocity to reactivity of muscle spindle receptors after cerebellectomy. GILMAN, S. AND W. I. MCDONALD ... 1513

Cholinesterase activity of the nictitating membrane reinnervated by cholinergic fibers. LENNON, A. M., C. L. VERA, A. L. REX, AND J. V. LUCO ... 1523

Potassium accumulation and transport in the rat sympathetic ganglion. BRINLEY, F. J., JR. ... 1531

Cortical and callosal connections concerned with the vertical meridian of visual fields in the cat. HUBEL, D. H. AND T. N. WIESEL ... 1561

Distribution of ^{14}C-labeled sucrose, inulin, and dextran in extracellular spaces and in cells of the leech central nervous system. NICHOLLS, J. G. AND D. E. WOLFE 1574

Uptake of radioactive glucose and its conversion to glycogen by neurons and glial cells in the leech central nervous system. WOLFE, D. E. AND J. G. NICHOLLS 1593

Announcements ... 1610

Index ... 1613

INDEX

ABRAMOV, I., 415
Acetylcholine
  release from preganglionic terminals, nature of, 114
Acoustic stimuli
  binaural, tonal patterns in auditory cortex after ablation, 710
  click-evoked potentials during conditioning, fear and modification, 893
  click-evoked unit responses in efferent olivocochlear bundle, noise masking and stimulus attenuation, 817
  evoked potentials during conditioning, 875
  low-frequency tones, phase-locked response in single auditory nerve fibers, 769
  microphonic potentials in cochlear nuclei, 697
  paired low-frequency tones, coding unit response in single auditory nerve fibers, 794
  physiological masking, defined, 931
  temporal association cortex, response in discrimination learning, 833
  varying test-click intensity, in physiological masking of peripheral auditory system, 931
Action potentials: *see* Cortical-evoked potentials; Electric potentials; Membrane potentials
Adaptation
  Golgi tendon organ to muscular force, viscoelastic interaction as factor, 1482
Afferent neurons, cutaneous
  Deiters' cells, excitation and organization, 603
Afferent neurons, muscle
  fiber conduction velocity, muscle spindle reactivity after cerebellectomy, 1513
  vestibular and peripheral impulses and Deiters' nucleus organization, 603
ALBE-FESSARD, D., 55, 81
ALJURE, E., 180
ALPERN, M., 562, 577
AMASSIAN, V. E., 844
ANDERSON, D. J., 769, 794
Anoxia
  reduction of membrane potential in single mammalian nerve fiber, 434
APPELBERG, B. AND F. EMONET-DÉNAND. Motor units of the first superficial lumbrical muscle of the cat, 154
Aplysia
  abdominal ganglion, light- and electron-microscope study, 1263, 1288, 1352
Association cortex
  temporal, single unit activity, 833
ASANUMA, H. AND H. SAKATA. Functional organization of a cortical efferent system examined with focal depth stimulation in cats, 35
Auditory cortex
  click-evoked potentials during conditioning, 875
  fear and modification of click-evoked potentials during conditioning, 893
  tonal pattern discrimination after bilateral ablation, 710
  varying test-click intensity in physiological masking, 931
Auditory pathways
  binaural tonal patterns, in ablation study of auditory cortex, 710
  brain-stem structures, role in sound localization, 341
  cochlear nuclei microphonic response to pure-tone stimuli, 697
  medial superior olivary neurons, stimulus coding, 1239
Auditory system
  peripheral, physiological masking in, 931
  varying test-click intensity, in physiological masking, 931
AXELROD, S., 710

BENNETT, M. V. L., Y. NAKAJIMA, AND G. D. PAPPAS. Physiology and ultrastructure of electrotonic junctions. I. Supramedullary neurons, 161
BENNETT, M. V. L., Y. NAKAJIMA, AND G. D. PAPPAS. Physiology and ultrastructure of electrotonic junctions. III. Giant electromotor neurons of *Malapterurus electricus*, 209
BENNETT, M. V. L., G. D. PAPPAS, E. ALJURE, AND Y. NAKAJIMA. Physiology and ultrastructure of electrotonic junctions. II. Spinal and medullary electromotor nuclei in Mormyrid fish, 180
BENNETT, M. V. L., G. D. PAPPAS, M. GIMÉNEZ, AND Y. NAKAJIMA. Physiology and ultrastructure of electrotonic junctions. IV. Medullary electromotor nuclei in Gymnotid fish, 236
BOURASSA, C. M., 530
BOURASSA, C. M., AND J. E. SWETT. Sen-

sory discrimination thresholds with cutaneous nerve volleys in the cat, 515
Brain stem
auditory structures, role in sound localization, 341
cardiovascular neurons in medulla oblongata, neurophysiological characacteristics, 645
nuclear complex, excitability changes in afferent preterminals, 949
pontine apneustic center, role in Hering-Breuer reflex integration levels, 301
BRINLEY, F. J., JR. Potassium accumulation and transport in the rat sympathetic ganglion, 1531
BROWN, T. S., 482

BUREŠOVÁ, O., 98
BURKE, R. E., 1169
BURKE, R. E. Composite nature of the monosynaptic excitatory postsynaptic potential, 1114

Cardiovascular system
medullary neurons regulating sympathetic impulses to, 645
Caudate nucleus
centrally excited medial diencephalic neurons, characteristics and distribution, 81
inhibition of single units and somatosensory response patterns, 55
Central nervous system
electrotonic junctions in fish, physiology and ultrastructure, 161, 180, 209, 236
large neurons of sea lamprey, physiology and anatomy, 1000, 1024
neurons and glial cells of leech, distribution of radioactive tracers, 1574, 1593
slow synaptic responses in sympathetic ganglia, significance, 494
Cerebellum
conduction velocity, muscle spindle reactivity after cerebellectomy, 1513
facilitation, effect on gastrocnemius muscle spindle activity, 1494
Cerebral cortex: *see also* specific areas and structures
somatosensory receptive fields of single units, 675
spreading depression as factor in extracellular space change, 911
Cholinergic transmission
cholinesterase activity of nictitating membrane reinnervated by cholinergic fibers, 1523
CHOW, K. L., 628
Click-evoked potentials
auditory neurons, varying test-click intensity in physiological masking, 931
during conditioning, 875
fear in modification of, during conditioning, 893
COATS, A. C. Physiological masking in the peripheral auditory system. III. Effect of varying test-click intensity, 931
Cochlear nuclei
coding of unit response to paired low-frequency tones, 794
efferent olivocochlear bundle, noise masking and stimulus attenuation, 817
microphonic responses to pure-tone stimuli, 697
phase-locked response to low-frequency tones, 769
COGGESHALL, R. E., 1288, 1352
COGGESHALL, R. E. A light and electron microscope study of the abdominal ganglion of *Aplysia californica*, 1263
Conditioning, aversive
click-evoked potentials during, 875
fear as factor in click-evoked potentials during, 893
Cortical-evoked potentials
motor cortical neurons, activation by surface stimulation, 844
pyramidal tract and segmental motoneurons, functional coupling between, 453
CREUTZFELDT, O. D., 1
Cutaneous stimuli
sensory discrimination threshold affected by, 515, 530

DALLAND, J. I., J. A. VERNON, AND E. A. PETERSON. Hearing and cochlear microphonic potentials in the bat *Eptesicus fuscus*, 697
Deiters' nucleus
organization, single-unit analysis, 603
unit excitation, response to peripheral and vestibular afferent nerve stimulation, 603
DENNIS, M. J. Electrophysiology of the visual system in a nudibranch mollusc, 1439
Depolarization
brain-stem trigeminal preterminals, effect of picrotoxin and strychnine, 949
Dextran
^{14}C-labeled, distribution in leech CNS, 1574
DE VALOIS, R. L., I. ABRAMOV, AND W. R. MEAD. Single cell analysis of wave-

length discrimination at the lateral geniculate nucleus in the macaque, 415
DEWSON, J. H. III. Efferent olivocochlear bundle: some relationships to noise masking and to stimulus attenuation, 817
DIAMOND, I. T., 341, 710
Diencephalon, medial
neurons, excitation of central origin, 81
neurons, somatosensory response pattern and caudate inhibition, 55
Discrimination
sensory, thresholds affected by cutaneous nerve stimulation, 515
DOESSCHATE, J. TEN, AND M. ALPERN. Effect of photoexcitation of the two retinas on pupil size, 562
DOESSCHATE, J. TEN, AND M. ALPERN. Influence of asymmetrical photoexcitation of the two retinas on pupil size, 577
Dorsal root cells
CNS of sea lamprey, characteristics and location, 1024

Electric potentials
caudate inhibition of medial diencephalic neurons, 55
central origin excitation of medial diencephalic neurons, 81
cerebral cortex, spreading depression and extracellular space change, 911
cochlear unit, coding response to paired low-frequency tones, 794
cochlear unit, phase locking to low-frequency tones, 769
cutaneous nerve stimulation and sensory discrimination, 515
electrotonic junctions, electromotor nuclei, 180, 236
electrotonic junctions, giant electromotor neurons, 209
electrotonic junctions, supramedullary, 161
first superficial lumbrical muscle of cat, linear relationship to other muscles, 154
lateral geniculate nucleus, nature and synaptic organization, 1
lemniscal evoked EPSPs in thalamic ventrobasal neurons, 360
medullary neurons, regulating impulses to cardiovascular system, 645
motor cortex efferent system, minimum stimulation, 35
muscle and cutaneous nerve stimulation, sensory discrimination compared, 530
noise masking and stimulus attenuation in efferent olivocochlear bundle, 817
postsynaptic of spinal motoneurons, current-voltage effect, 1097
postsynaptic of spinal motoneurons, linearity of origin, 1114
postsynaptic of spinal motoneurons, location of synapses, 1072
pyramidal tract neurons, dendritic component in negative-wave generation, 753
pyramidal tract neurons, recurrent facilitation, 22
retinal ganglion cell and S-potential responses compared, 546
S-potential response and retinal ganglion cell response compared, 546
trigeminal relay presynaptic inhibition, 135
ventrolateral thalamus, Renshaw-like response with intranuclear stimulation, 482
Electroretinogram
frequency analysis, 982
EMONET-DÉNAND, F., 154
ENCABO, H., 1194, 1221
EVOY, W. H., 859
Excitation
brain-stem nuclear complex, 949
of central origin in medial diencephalic neurons, 81
postsynaptic potentials, lateral geniculate nucleus, 1

Facilitation
cerebellar, of gastrocnemius muscle spindle activity, 1494
recurrent, distribution in cervical motoneurons, 661
recurrent, in pyramidal tract neurons, 22
FELTZ, P., 81
FELTZ, P., G. KRAUTHAMER, AND D. ALBE-FESSARD. Neurons of the medial diencephalon. I. Somatosensory responses and caudate inhibition, 55
Fever pathogenesis
pyrogen induced, hypothalamic site of action, 586
FIELDS, H. L., W. H. EVOY, AND D. KENNEDY. Reflex role played by efferent control of an invertebrate stretch receptor, 859
Fish
electrotonic junctions in CNS, physiology and ultrastructure, 161, 180, 209, 236
hearing organ in goldfish, 1377
